

TextraSOFT™

TextraSOFT™ is a long textile-type fiberglass insulation which uses a new patent-pending binder that contains no phenol, acrylics, or artificial colors.

Unlike traditional fiberglass and mineral wool insulation, Anco's patent-pending binder eliminates formaldehyde from the manufacturing process.

The unique properties of TextraSOFT™ (90% recycled content) insulation will allow it to be an excellent solution for many thermal and acoustical applications

Now Made With

TextraSOFT™

**Fiberglass Insulation
100% Formaldehyde
& Acrylic Free**
